# Why partner with intimus?

ELEVATE YOUR SECURITY AND EFFICIENCY WITH US

## SHREDDER EXPERTS SINCE 1956

### Shredder experts since 1956

The intimus brand was founded in 1956 with a simple vision: to help people protect their privacy. Since then, we have continued to innovate and revolutionize the information security market. Trust in our experience: At intimus, we have long recognized the need to keep pace with the flood of information.

## MADE IN GERMANY

### Made in Germany

A passion for precision paired with a proud tradition of security innovations, intimus International proudly bears the renowned “made in Germany” seal of quality. It stands for the highest quality, but also for the reliability and durability of German engineering.

## HIGH SECURITY SPECIALISTS

### High security specialists

intimus International sets standards in terms of confidentiality and offers premium solutions in high security sectors, where the protection of your data is paramount. intimus is your specialist when it comes to high security document shredders.

## LARGE PRODUCT PORTFOLIO

### Large product portfolio

Our extensive product portfolio offers a wide range of solutions for every need in the field of data destruction. The product range includes “paper destruction solutions”, “media destruction solutions”, “cardboard recycling” and also “degaussing & crushing”. Trust in our variety: Convince yourself of our large product portfolio.

# Why are paper shredders important?

## PUT AN END TO DATA MISUSE

Shredders help protect sensitive information by ensuring that documents containing personal, financial or confidential data are irreversibly destroyed. This is essential to prevent identity theft and unauthorised access to private information. Businesses and individuals often deal with private documents which, if not disposed of correctly, can lead to data breaches. Shredding documents ensures that private information remains confidential. Many regulations, such as GDPR and HIPAA, require the secure

disposal of sensitive information. By using a shredder, organisations can comply with these legal requirements and avoid potential fines. Knowing that sensitive documents are being shredded acts as a deterrent to potential fraud and identity theft.

### **We have the solution you need:**

Thanks to our wide product range, including various security levels for different media and different bin volumes, we can cover all requirements.

# PROTECT YOUR DATA

## GDPR-COMPLIANT PAPER DESTRUCTION

# Privacy practices

DATA PROTECTION CONCEPTS FOR YOUR COMPANY

## Clean Desk Policy

In the office, a lot of documents are passed around every day, some of them containing sensitive information. Making sensitive data available to unauthorised third parties can violate data protection laws. To protect data in the workplace, you need a clear strategy for your paper documents. Don't make unnecessary copies. Only print documents when you need to, and be careful who you hand them to. Train your staff to file documents sensibly, store confidential information securely and destroy documents that are not required immediately with a **intimus shredder**.

SHRED  
DOCUMENTS  
THAT ARE  
NOT REQUIRED  
IMMEDIATELY

## Achiving

Digitisation in the workplace does not end with the simple scanning of documents. To ensure that you comply with data protection regulations, confidential papers must be destroyed quickly and in compliance with the GDPR once they have been archived. That's why a shredder right next to your scanner is absolutely essential. Our office document shredders are the best choice for centralised shredding directly at your workplace.

All **intimus models** are very powerful and have different container volumes.

## Avoid data leaks

Bin raiding involves rummaging through other people's rubbish in search of sensitive data. This can have pretty serious consequences, such as identity theft or commercial fraud. Waste disposal companies make it look easy to get rid of paper waste. Since sensitive documents are collected and stored at such disposal companies, data can be stolen and you are liable even though the documents are no longer in your possession. It is therefore safer to destroy the documents yourself with an **intimus document shredder** immediately at the workplace.

# The right shredder for every requirement

## WHAT SHOULD YOU CONSIDER WHEN BUYING A DOCUMENT SHREDDER?

### How large should my shredder be?

The appropriate bin volume for your shredder depends on several factors. First, ask how many people will be using the machine. The more people, the larger the bin volume should be.

At intimus we distinguish 4 office categories:

#### HOME / SMALL OFFICE

for up to 3 people with approx. up to 30 l

#### OFFICE

for up to 5 people with approx. up to 50 l

#### LARGE OFFICE

for up to 10 people with approx. up to 120 l

#### DEPARTMENT

for up to 25 people with approx. up to 200 l

You should also consider how often a device is used by the users. If a shredder is only occasionally in use, then choose a device from the lower range of the recommended volume. If the unit is used frequently, lean more toward the upper range. If the shredder is used infrequently or very infrequently, then choose a device in the next lower category if necessary.

### What is the difference between strip cut, cross cut and particle cut?

The cut types describe the type of particles that are created when a sheet of paper is shredded. In strip cut, a sheet is cut into several strips. In cross cut (also called particle cut), a sheet of paper is cut not only lengthwise but also crosswise, resulting in smaller particles.

Strip cut

Cross cut

### What type of data media can be shredded?

With your intimus document shredder, you can easily destroy your data in paper form. Depending on the device, other media such as CDs, DVDs, floppy disks and plastic cards can also be destroyed. Many of our document shredders have separate collection bins for paper and media so that the different materials can be disposed separately in a simple and environmentally friendly manner. We also have a wide range of products in the high-security sector, which destroy media that must meet special security standards.

### What security levels are available?

Shredders do not simply destroy, but are an indispensable tool for companies, institutions and private users to protect sensitive data. DIN 66399 (ISO/IEC 21964) creates clarity in data protection, specifies the variety of different data carriers and defines precise security standards for their proper destruction. This standard classifies seven different security levels and 6 types of material.

(P) PAPER MEDIA

(O) OPTICAL MEDIA

(T) MAGNETIC MEDIA

(E) ELECTRONIC MEDIA

(F) MICROFILMS

(H) HARD DRIVES WITH MAGNETIC DATA

The higher the number of the security level (1-7), the less likely it is that the destroyed media can be reconstructed. On the next page you will find more detailed information about security levels and particle sizes.

## Class 1

Normal protection requirement for internal data.

### Security level 1

**Security rating: Very low**

After destruction, the data can be reproduced without special devices but with special time expenditure.

Paper Films  
Print forms

**P-1**

Particle size  $\leq 2000 \text{ mm}^2$   
Strip width  $\leq 12 \text{ mm}$   
Strip length not limited

CDs/  
DVDs  
Blu-ray  
Discs

**O-1**

Particle size  $\leq 2000 \text{ mm}^2$

Floppy disks  
Magnetic  
cassettes  
ID cards with  
magnetic strips

**T-1**

Mechanically inoperable

USB sticks  
Chip cards  
SSDs  
Phones/Tablets  
Memory cards

**E-1**

Mechanically/  
electronically  
inoperable

Microfilms

**F-1**

Particle size  $\leq 160 \text{ mm}^2$

HDDs  
with magnetic  
data

**H-1**

Mechanically/  
electronically  
inoperable

### Security level 2

**Security rating: Low**

After destruction, the data can only be reproduced with special devices and special effort.

**P-2**

Particle size  $\leq 800 \text{ mm}^2$   
Strip width  $\leq 6 \text{ mm}$   
Strip length not limited

**O-2**

Particle size  $\leq 800 \text{ mm}^2$

**T-2**

Cut into several  
pieces and  
particle size  
 $\leq 2000 \text{ mm}^2$

**E-2**

Medium split

**F-2**

Particle size  $\leq 30 \text{ mm}^2$

**H-2**

Medium damaged

### Security level 3

**Security rating: Medium**

After destruction, the data can only be reproduced with considerable effort (people/special recovery devices/time).

**P-3**

Particle size  $\leq 320 \text{ mm}^2$   
Strip width  $\leq 2 \text{ mm}$   
Strip length not limited

**O-3**

Particle size  $\leq 160 \text{ mm}^2$

**T-3**

Particle size  $\leq 320 \text{ mm}^2$

**E-3**

Medium split  
and  
particle size  
 $\leq 160 \text{ mm}^2$

**F-3**

Particle size  $\leq 10 \text{ mm}^2$

**H-3**

Medium deformed

## Class 2

High protection requirement for confidential data.

### Security level 4

**Security rating: Medium**

After destruction, the data can only be reproduced with exceptionally high effort (people/special recovery devices/time).

**P-4**

Particle size  $\leq 160 \text{ mm}^2$   
And for regular  
particles:  
Strip width  $\leq 6 \text{ mm}$

**O-4**

Particle size  $\leq 30 \text{ mm}^2$

**T-4**

Particle size  $\leq 160 \text{ mm}^2$

**E-4**

Data carrier (chip) split  
and particle size  
 $\leq 30 \text{ mm}^2$

**F-4**

Particle size  $\leq 2,5 \text{ mm}^2$

**H-4**

Medium split and  
deformed several  
times and particle size  
 $\leq 2000 \text{ mm}^2$

### Security level 5

**Security rating: High**

After destruction, the data can only be reproduced with the use of non-commercial equipment or special constructions as well as forensic methods.

**P-5**

Particle size  $\leq 30 \text{ mm}^2$   
And for regular  
particles:  
Strip width  $\leq 2 \text{ mm}$

**O-5**

Particle size  $\leq 10 \text{ mm}^2$

**T-5**

Particle size  $\leq 30 \text{ mm}^2$

**E-5**

Data carrier (chip)  
split several times and  
particle size  
 $\leq 10 \text{ mm}^2$

**F-5**

Particle size  $\leq 1 \text{ mm}^2$

**H-5**

Medium split and  
deformed several  
times and particle size  
 $\leq 320 \text{ mm}^2$

### Security level 6

**Security rating: Very high**

After destruction, the data is impossible to reproduce according to the state of the art in technology.

**P-6**

Particle size  $\leq 10 \text{ mm}^2$   
And for regular  
particles:  
Strip width  $\leq 1 \text{ mm}$

**O-6**

Particle size/ash  
 $\leq 5 \text{ mm}^2$   
or melt  
product

**T-6**

Particle size  $\leq 10 \text{ mm}^2$

**E-6**

Data carrier (chip)  
split several times and  
particle size/ash  
 $\leq 1 \text{ mm}^2$

**F-6**

Particle size/ash  
 $\leq 0,5 \text{ mm}^2$

**H-6**

Medium split and  
deformed several  
times and particle size  
 $\leq 10 \text{ mm}^2$

## Class 3

Very high protection requirements for particularly confidential and secret data.

### Security level 7

**Security rating: Extremely high**

After destruction, the data is impossible to reproduce according to the state of the art in science and technology.

**P-7**

Particle size/melt/ash  
 $\leq 5 \text{ mm}^2$   
And for regular  
particles:  
Strip width  $\leq 1 \text{ mm}$

**O-7**

Particle size/ash  
 $\leq 0,2 \text{ mm}^2$   
or melt  
product

**T-7**

Particle size/ash  
 $\leq 2,5 \text{ mm}^2$   
or melt product

**E-7**

Data carrier (chip)  
split several times and  
particle size/ash  
 $\leq 0,5 \text{ mm}^2$

**F-7**

Particle size/ash  
 $\leq 0,2 \text{ mm}^2$   
or melt  
product

**H-7**

Medium split and  
deformed several  
times and particle size  
 $\leq 5 \text{ mm}^2$  or heating  
above curie temperature

## WHY BUY AN INTIMUS SHREDDER?

# Why buy an intimus shredder?

### INDUSTRY INNOVATIONS

intimus is constantly innovating, introducing cutting-edge features like automated oilers and anti-paper-jam technologies that keep shredding effortless and efficient.

### CERTIFIED SECURITY STANDARDS

intimus shredders are independently tested and certified to meet or exceed international security standards such as DIN 66399. This ensures complete compliance for organizations handling sensitive or classified information.

### REPUTATION FOR RELIABILITY

intimus shredders are known for their consistent performance, even under heavy-duty usage. Businesses and organizations rely on them for critical document destruction tasks without fear of breakdowns.

### REDUCED MAINTENANCE NEEDS

Thanks to advanced engineering and durable components, intimus shredders require less frequent maintenance and fewer part replacements, reducing total cost of ownership over time.

### GLOBAL TRUST AND EXPERTISE

With decades of experience, intimus is a trusted global brand in document security and data destruction. Our products are used by governments, corporations, and institutions worldwide, proving their reliability and quality.

### EXCEPTIONAL CUSTOMER SUPPORT

intimus provides industry-leading support, including extended warranties, repair services, and dedicated customer assistance, ensuring you get the most out of your shredder.

### COMPREHENSIVE RANGE OF APPLICATIONS

Whether you need shredders for personal, office, or industrial use, intimus provides a wide variety of options tailored to your needs, all maintaining the highest levels of security and reliability.

### WIDE RANGE OF SECURITY LEVELS

intimus offers shredders across all DIN security levels, from basic P-2 for general documents to P-7 for top-secret government data. This range allows you to select the perfect machine for your security needs.

### VERSATILE SHREDDING OPTIONS

intimus shredders go beyond just paper. They can handle various media, including CDs, credit cards and other data carriers, making them a comprehensive data destruction solution.

# What makes our intimus shredders special?

## **SMALLEST PARTICLE SIZE**

intimus shredders set the standard for high security shredding. Their precision engineered cutting cylinders deliver the smallest particle sizes available on the market, ensuring the highest level of protection for your sensitive documents.

## **FAST POWERFUL MOTORS**

intimus document shredders shred paper up to twice as fast as the competition. The high speed also means more paper can be shredded in less time. This saves you valuable time in your day-to-day work.

## **LONG USEFUL LIFE**

SolidCut offers significant advantages in terms of cutting strength, precision and shredder life. intimus engineers have developed a sophisticated manufacturing process that incorporates CNC cylinders to achieve greater steel hardness as well as a special heat treatment that guarantees a much longer life cycle of the cutting cylinders. Even after years of operation, intimus shredders still deliver excellent results.

## **SHREDDERS HAVE NEVER BEEN SO SILENT**

Document shredders should be installed as close as possible to the workplace. Our shredders have a particularly low noise level. Thanks to Silentec®, a completely new type of cutting head bearing that ensures maximum vibration damping during shredding, they can also be used in open-plan offices.

## **MAXIMUM ENERGY EFFICIENCY**

intimus shredders are equipped with the 'EcoLogic' energy management system as a quality standard. In addition to power-efficient motors, our devices switch to 'sleep mode' after long periods of inactivity to reduce your operating costs and at the same time contribute to reducing your ecological footprint.

## **TROUBLE-FREE USE**

The Dynamic Load Sensor (DLS) system detects the paper volume as it feeds to the cutting unit, protecting against possible overloads and jamming, and extends the service life of the machine.

## **SEAMLESS DATA PROTECTION**

intimus shredders are controlled by the i-control® system, which is the heart of all shredder functions and provides comprehensive visual information for maximum clarity.

## **HIGHEST QUALITY & SAFETY STANDARDS**

Our shredders are all designed to regulate the power of the motors for better protection against overheating.

## **SUSTAINABILITY COMMITMENT**

We also use sustainable and durable materials. Such as base cabinets made of wood and metal or collection bags made of recycled plastic. All our shredders are repairable and individual parts can be replaced if they are damaged.

When you choose an intimus shredder, you're not just buying a machine - you're investing in efficiency, security and long-term value, backed by a brand with an outstanding reputation in the industry.

## Shredder bags

### CONVENIENT BAGS KEEP WORK AREAS CLEAN

We have different bag sizes for shredders. Choose a bag suitable for the volume of your waste bin. Maximum tear strength.

Shredder bags	Article number
intimus models: 130, 175, 175 hybrid (only for paper receptacle)	99952
intimus models: 205	99954
intimus models: 85, 100, 120, 175 hybrid (only for CD receptacle)	97461
intimus models: 60	97620
intimus models: 45	97620

## Receptacles

### REUSABLE WASTE CONTAINERS

Available for various base cabinet sizes.

Receptacles	Article number
Receptacle for intimus 130	79299
Receptacle for intimus 175	85829
Receptacle for intimus 175 hybrid (Paper)	94478
Receptacle for intimus 175 hybrid (CD)	94477
Receptacle for intimus 205	95603

## Oil 100 ml

### GENERAL OILING

Can be used for any shredder. Very easy to use. The oil is sprinkled onto 2-3 paper sheets which are then destroyed. It is not recommended to sprinkle the oil directly onto the blades.

## Oil 2 Litres

### AUTOMATIC OILING LARGE MACHINES

The 2-litre oil bottles are designed for large shredders with automatic oiling. It is important to always keep a spare bottle on hand to ensure proper lubrication of the machine.

## Oil 1 Litre

### AUTOMATIC OILING SMALL MACHINES

The 1-litre oil bottles are designed for small shredders like intimus 45/60 with automatic oiling. It is important to always keep a spare bottle on hand to ensure proper lubrication of the machine.

## Oil 5 Litre

### HIGH PERFORMANCE OILING

The 5-litre oil tank is designed for high-performance equipment. Correct lubrication of the cutting heads guarantees a longer cutting head life.

Lubricating oil for all commercially available shredders	Article number
intimus lubricating oil 100 ml (Packaging unit: 6 pieces)	97644
intimus lubricating oil 1 litre	96917
intimus lubricating oil 2 litres	96945
intimus lubricating oil 5 litres	96946
