

intimus H200 CP4

HEAVY-DUTY SHREDDER WITH HOPPER

Industrial

P-4 | High-capacity shredder with hopper capable of handling up to 75 sheets at once, with a generous bin capacity of 200 litres

Shredding material:

- Paper with staples and paper clips
- CD / DVD / Blu-ray
- Plastic card
- Crumpled paper
- Floppy disk
- Foil

The intimus H200 CP4 industrial shredder is designed for the destruction of individual documents in large volumes. This high-performance machine is designed for demanding environments such as archives, government institutions or centralised document shredding centres, and offers unrivalled data security. With a cutting accuracy of 3.8 x 40 mm, it meets and exceeds strict data protection requirements, ensuring that sensitive documents are rendered unreadable and irretrievably destroyed.

Although it specialises in shredding standard paper – including sheets with staples or paper clips – it can also handle a wide range of other materials such as credit cards, CDs, DVDs, transparencies and floppy disks. This versatility makes it a powerful all-in-one solution for companies that manage different and sensitive media formats.

One of the outstanding features of the H200 CP4 is its ability to process crumpled or loose paper directly from the tray using a high-performance feeder. This feature streamlines workflow by reducing the need for manual handling and significantly increasing operational efficiency. Whether it's flat sheets or bulky waste paper, the shredder adapts perfectly to the task at hand.

Mobility and convenience are enhanced by the sturdy wheels that enable smooth transportation and effortless repositioning around the workspace. The shredder is designed to flexibly integrate into any office or industrial environment, whether it is permanently stationed in one area or deployed across multiple departments.

Designed with ease of use and cleanliness in mind, the H200 CP4 features a fully enclosed, dust-free mobile base. It has a generous 200-litre capacity for shredded waste, which is collected in a reusable bag mounted on a sliding rack. This well-thought-out design allows materials to be quickly removed and disposed of, minimising downtime and promoting uninterrupted workflow. The use of a reusable collection bin also supports sustainability efforts by reducing single-use waste.

Its flexibility and user-friendliness are enhanced by the intuitive and intelligent control system. The shredder is activated automatically by a built-in light barrier sensor when paper is inserted into the opening. For manual operation, the user has a soft-touch membrane keyboard that provides clear and direct commands. In the event of a paper jam, the unit's automatic reverse function is activated immediately, clearing the obstruction and allowing operations to continue smoothly without the need for manual intervention.

The intimus H200 CP4 document shredder is proof of efficient, secure and user-friendly document shredding. With its robust design, state-of-the-art features and versatile media processing, it is the ideal choice for organisations looking for a reliable, high-capacity solution to meet strict document shredding requirements.

KEY FEATURES

- Able to process crumpled paper directly from the bin via a feed hopper.
- The particles sized at 3.8 x 40 mm meet the P-4 security standard outlined in DIN 66399 (ISO/IEC 21964).
- Efficiently handles 65-75 sheets of 80 g/m² paper, along with paperclips and staples.
- With a throughput of up to 3.636 sheets per minute, it ensures swift and effective document processing.
- Capable of securely disposing of credit cards, CDs, foils, floppy disks and also crumpled paper.
- Maintains a peaceful work environment with a low operating noise level of 55 dB(A).
- Enhanced mobility provided by castors, complemented by a sturdy metal cabinet.
- Equipped with a spacious 200-litre waste bag, mounted on a sliding frame for effortless disposal.
- Features an intuitive control panel designed to streamline shredding tasks for users.
- Enables effortless document shredding with automatic start/stop function, auto reverse, anti-paper jam technology, bin full sensor, overheat protection and optional automatic oiler.

SPECIFICATIONS

Area of application	Industrial
Feed type	Manual
Cutting size paper (mm x mm)	3,8 x 40
Cutting type paper	Cross cut
Security level ISO/IEC 21964 (DIN 66399)	P-4 / O-3 / T-4 ¹ / F-1 / E-3 ³
Shredding material	Paper with staples and paper clips, CD / DVD / Blu-ray, Plastic card, Crumpled paper, Floppy disk, Foil
Waste disposal solution	Metal frame with reusable bag
Intake width (mm)	444
Possible paper formats (DIN)	A2
Sheet capacity (80g/m ²)	65 - 75
Throughput	up to 3.636 sheets/min
Cutting speed (80g/m ²) mm/s	240
Bin volume (l)	200
Continuous Running	yes
Noise level (idle operation) dB(A)	55
Nominal motor power (W)	2.600
Power supply (V / Hz)	400 / 50
Other voltages available	yes
Product dimensions W x D x H (cm)	75 x 55 x 180
Product weight (kg)	217
Control operation	Buttons
Visual status indication for ...	Ready, Material jam, Bin full, Door open, Hopper open
Automatic start/stop	yes
Auto reverse	yes
Paper jam protection	yes
Overheat protection	yes
Bin full sensor	yes
Automatic oiler	optional
Castors	yes
Material machine housing	Metal
Made in Germany	yes
Certificates / Listings	CE, UKCA

¹ Only floppy disks / ID cards.

³ Only plastic cards with electronic chip.
